Program Description

The Teacher Education Program (TEP) offers the Education Specialist Moderate/Severe (Special Ed), Multiple Subject (Elementary), and Single Subject (Secondary) Preliminary California State Teaching Credentials combined with a Master’s Degree in Education. The one-year, full-time combined Education Specialist, Multiple Subject, Single Subject Credential/Master’s Degree program is designed to provide the knowledge and experience, both academic and practical, needed to begin a teaching career. Student teaching is concurrent with coursework so that the knowledge, theories, and concepts taught at the University can be directly and immediately applied in the classroom setting. Single Subject Teaching credentials are available in the following subjects: Biology, Chemistry, English, French, Geoscience, German, Latin, Mathematics, Physics, Social Science, and Spanish. The Teacher Education Program, in conjunction with the Department of Education, also offers the Education Specialist Moderate/Severe Preliminary Credential with an optional Master of Arts degree in Special Education, Disabilities, and Risk Studies. For more information regarding the UC Santa Barbara Teacher Education Program please contact the Teacher Education Program Office at (805) 893-2084.
