Brief Parent Survey: Assessing Service Needs Within the Autism Community During COVID-19

Who?
Parents/primary caregivers of an individual (aged 2 or older) diagnosed with autism spectrum disorder can participate in our study by completing this brief survey.

Why?
Your answers will provide helpful information to autism researchers and service providers to better support you and your family during the COVID-19 crisis and its aftermath.

UCSB Koegel Autism Center

To participate and gain access to our resource page, please follow this link: COVID-19 Experiences Survey

A comprehensive list of nationwide resources will be offered alongside the survey.

For more information, please email us at autism@ucsb.edu

10 participants will receive a $25 Amazon gift card as part of a raffle.
