Welcome TEP Students:

The Gevirtz School is providing you with a Campus "Connect -Google Apps for Education Account." This suite is a powerful communication and collaboration set of tools, which also gives you an @education.ucsb.edu email account.

What you need to know for now is how to gain access and begin using the account, as well as how to find the most important information on how to use the suite.

**To login to the Connect account go to:**

http://connect.ucsb.edu and Click on the "Google Web App" item at the top of the page.

Your login is your UCSBNetUid@ucsb.edu AND your UCSBNetUid password. E.g. if your UCSBNetUID is jsmith you will login as jsmith@ucsb.edu and the corresponding password.

We realize that you likely already have claimed your campus Umail Account and might be questioning why another account is being provided. The GGSE as a school opted to move to using the Connect system before the campus as a whole, in anticipation of ALL students eventually using the Connect system at some point in the future. So for now our suggestion (even though you have several choices) is that you set a forward from your Umail Account to your Connect email account and use the Connect account for all your UCSB mail.

It's important to note that ALL GGSE and TEP correspondence will be sent to your Connect @education.ucsb.edu email account.

Last of all we highly suggest that you look at the following areas within the Connect Site as you will find most of your questions answered there.
